<b>Subject</b>	Public Comment on Jacob Macduff shooting for PSAB

Good Evening,

I normally do not comment in an official setting like this, but recent events have made it so that I have questions I'd like the Public Safety Advisory Board to address with the Tigard Police Department.

The conspicuous lack of information released regarding the Jacob Macduff shooting, along with focus on the resulting protest, and the narrative of the victim's roommate conflicting with official statements, gives the impression of a deliberate cover up. If the city has nothing to hide, if the officer involved did nothing wrong why have we not seen any hard evidence?

I'm a lifelong Tigard Resident, currently serving in the US Navy and planning on returning when my contract is over. It is my home. If we don't learn from horrific incidents like the death of Jacob Macduff, how are we supposed to heal?

Secondary to my first question is the idea of body cams. I would like to know Chief McAlpine's thoughts on implementing body cams on every officer as well as improved training. As someone familiar with the use of lethal force and proper escalation to it, Officer Maldonado firing ten rounds into a parked car, at an unarmed man seems like either poor training or panic.

Either deficiency needs to be corrected in every other Tigard Police Officer to prevent more senseless death.

Thank you for your time.

- 1) I would like to see a more comprehensive approach to Public Safety by the Board in its work play. So far it seems somewhat confined to the police only.

**Public safety organizations** include law enforcement, fire and emergency medical services, disaster planning etc. The public safety issues that a municipality might grapple with include narcotic use, trespassing, burglary, harassment, juvenile delinquency, unauthorized living, noise, [littering](#), inappropriate social behavior, inebriation, and other quality of life issues.

Generally organizations are involved in the [prevention](#) of and protection from events that could endanger the [safety](#) of the [general public](#) from significant [danger](#), injury, or [property damage](#), such as [crimes](#) or disasters ([natural](#) or human-made).

- 2) I would encourage the members to refrain from personal opinion comments on the officer involved shooting until the investigation reports out. last meeting there seemed to be one member who seemed to express her personal opinion.

What are you going to do to ensure that another citizen in a mental health crisis won't be killed by police? what accountability are the police going to take and what will you do to ensure the smear campaign that was held against Mr. Macduff will be changed and give citizens factual information about his mental state and not being violent.
